

Clean Energy for Botswana & Beyond

Powered by Tlou Energy Limited

Disclaimer

The presentation materials (the “**Presentation Materials**”) are confidential and being supplied to you solely for your own information and may not be reproduced, further distributed, or the contents otherwise divulged, directly or indirectly, to any other person or published, in whole or in part, for any purpose whatsoever.

These Presentation Materials do not constitute or form part of any invitation, offer for sale or subscription or any solicitation for any offer to buy or subscribe for any securities in Tlou Energy Limited (the “**Company**”) (“**Company Securities**”) nor shall they or any part of them form the basis of or be relied upon in connection with, or act as any inducement to enter into, any contract or commitment with respect to Company Securities. These Presentation Materials are for information purposes only and must not be used or relied upon for the purpose of making any investment decision or engaging in any investment activity. Whilst the information contained herein has been prepared in good faith, neither the Company, its subsidiaries (together with the Company, the “**Group**”) nor any of the Group’s directors, officers, employees, agents or advisers makes any representation or warranty in respect of the fairness, accuracy or completeness of the information or opinions contained in the Presentation Materials or otherwise in relation to the Group or its business, and responsibility and liability therefore (whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise) is expressly disclaimed, provided that nothing herein is intended to limit the liability of any such person for fraud. No duty of care or advisory obligation is owed by any member of the Group or any of its directors, officers, employees, agents or advisers to any recipient of the Presentation Materials. No reliance may be placed for any purpose whatsoever on the information contained in the Presentation Materials or the completeness or accuracy of such information. The figures and projections included in the Presentation Materials are based on internal assumptions made by the directors and employees of the Company and have not been reviewed or verified as to their accuracy by any third party. The information contained in the Presentation Materials are provided as at the date of this presentation and are subject to updating, completion, revision, verification and further amendment without notice. However, the Company does not undertake or agree to any obligation to provide the recipient with access to any additional information or to update the Presentation Materials or to correct any inaccuracies in, or omissions from the Presentation Materials which may become apparent. The Presentation Materials should be read in conjunction with the Company’s other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange (ASX), which are available at www.asx.com.au.

The content of these Presentation Materials has not been approved by an authorised person within the meaning of the Financial Services and Markets Act 2000 (“**FSMA**”). Reliance on the Presentation Materials for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested. Any person who is in any doubt about the subject matter to which these Presentation Materials relates should consult a person duly authorised for the purposes of FSMA who specialises in the acquisition of shares and other securities.

The Presentation Materials do not constitute an offer of transferable securities to the public for the purposes of section 85 FSMA. The Presentation Materials are exempt from the general restriction set out in section 21 FSMA on the communication of financial promotions on the grounds that they are directed only at: (i) persons whose ordinary activities involve them in acquiring, holding, managing and disposing of investments (as principal or agent) for the purposes of their business and who have professional experience in matters relating to investments or otherwise are “investment professionals” for the purposes of Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “**Order**”); (ii) are persons who fall within Article 49(2)(a) to (d) of the Order; or (iii) otherwise fall within an applicable exemption within the Order (all such persons together being referred to as “**Relevant Persons**”). Persons of any other description, including those that do not have professional experience in matters relating to investment, should not rely or act upon the Presentation Materials. Any investment, investment activity or controlled activity to which the Presentation Materials may ultimately relate is available only to Relevant Persons and will be engaged in only with such Relevant Persons. The Presentation Materials are being distributed for and are only directed at Relevant Persons within the UK. Any person who is not a Relevant Person within the UK should not act or rely on the Presentation Materials.

The Presentation Materials do not constitute an offer of securities for sale in the United States, Australia, Japan or the Republic of South Africa or in any other country outside the United Kingdom where such distribution may lead to a breach of any legal or regulatory requirement, nor may they be distributed to persons with addresses in the United States, Australia, Japan or the Republic of South Africa, or to any national or resident of the United States, Australia, Japan or the Republic of South Africa, or to any corporation, partnership, or other entity created or authorised under the laws thereof. Any such distribution could result in a violation of American, Australian, Japanese or South African law. It is the responsibility of each recipient outside the United Kingdom to ensure compliance with the laws of and regulations of any relevant jurisdiction. The Company Securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the “**Securities Act**”), or the securities laws of any state or other jurisdiction of the United States and may not be offered and sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. There will be no public offering of Company Securities in the United States.

Disclaimer continued

No recipient of these Presentation Materials should deal in or attempt to deal in or otherwise engage in any behaviour in relation to financial instruments (as defined in the Market Abuse Regulation ("MAR")), which would or might amount to "market abuse" for the purposes of MAR, based on the information in these Presentation Materials (and any related materials) until after the information has been made generally available. Nor should the recipient use the information in these Presentation Materials (and any related materials) in any way which would constitute market abuse. These Presentation Materials contain information which is, or may be, inside information in relation to the Company's listed securities. Accordingly, any person who receives these Presentation Materials must not deal in the Company's securities or encourage anyone else to do so and must not disclose these Presentation Materials to any other person until such time as the information ceases to be inside information. A breach of UK insider dealing rules may be a criminal offence and/or may constitute market abuse and these Presentation Materials are given on the basis that all recipients understand their legal and regulatory obligations with respect to inside information under both MAR and Part V of the Criminal Justice Act 1993.

Past performance information given in these Presentation Materials is given for illustrative purposes only and should not be relied upon as (and is not) an indication of future performance. These Presentation Materials contain forward-looking statements, including in relation to the Company, the Group and the Group's proposed strategy, plans and objectives. Such statements are generally identifiable by the terminology used, such as "may", "will", "could", "should", "would", "anticipate", "believe", "intend", "expect", "plan", "estimate", "budget", "outlook" or other similar wording. Indications of, and guidance on, future earnings and financial position and performance are also forward-looking statements. By its very nature, such forward-looking information requires the Company to make assumptions that may not materialise or that may not be accurate. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the control of the Company that could cause the actual performance or achievements of the Company to be materially different from any future results, projections, guidance on future earnings and estimates, performance or achievements expressed or implied by such forward-looking statements and such statements should not be relied upon as an indication or guarantee of future performance. It is believed that the expectations reflected in these statements are reasonable, but they may be affected by a range of variables which could cause actual results or trends to differ materially, including but not limited to: price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimates, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory developments, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates, and other factors, many of which are beyond the control of the Company. Furthermore, the forward-looking information contained in the Presentation Materials is made as of the date of the Presentation Materials and the Company accepts no obligation to disseminate any updates or revisions to such forward-looking statements. The forward-looking information contained in the Presentation Materials is expressly qualified by this cautionary statement.

The Presentation Materials are confidential and being supplied to you solely for your own information and may not be reproduced, further distributed, or the contents otherwise divulged, directly or indirectly, to any other person or published, in whole or in part, for any purpose whatsoever. Investors are advised that by their nature as visual aids, presentations provide information in a summary form. The key information can be found in the Company's ASX, BSE and AIM press releases.

WARNING: You are advised to exercise caution in relation to the Presentation Materials. If you are in any doubt about any of the contents of these Presentation Materials, you should obtain independent professional advice. An investment in the Company's shares is subject to investment and other known and unknown risks, some of which are beyond the control of the Company. The Company does not guarantee any particular rate of return or the performance of the Company. Persons should have regard to the risks outlined in these Presentation Materials. By accessing these Presentation Materials, you warrant, represent, undertake and acknowledge to the Company that (a) you have read and agree to comply with the foregoing limitations and restrictions including, without limitation, the obligation to keep these Presentation Materials and its contents confidential, (b) you agree to take all necessary steps to preserve such confidentiality, (c) you are able to receive these Presentation Materials without contravention of any applicable legal or regulatory restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of any such jurisdiction.

Overview

Tlou is contributing to a cleaner, sustainable and more secure energy future for Botswana and beyond

Tlou Energy

...Gas, Solar and Hydrogen

- Tlou is developing sources of clean energy in Botswana
- Strategic location in Botswana's Central District
 - ✓ Cleaner energy to displace coal and diesel power
 - ✓ Gas, solar and a hybrid power solution
 - ✓ Any gas emissions can be sequestered
 - ✓ Tlou's gas / solar can be used to produce Hydrogen (H₂)
 - ✓ Potentially lucrative carbon by-products from H₂ production
- Extensive environmental approvals in place
- Generation licences secured to produce electricity from gas and solar
- Established and consistent gas flows
- Progress hydrogen while building infrastructure for initial power supply to the grid

Tlou's Gas and Solar... the key to cleaner fuel and power

Location

Project located in Botswana's Central District

Power need in Sub-Saharan Africa

A Changing Environment

Strong momentum towards cleaner energy to prevent environmental degradation

Over-reliance on Carbon-intensive Power

Existing electricity is largely produced from carbon intensive coal and diesel

Power Deficits

Regional power supply is currently unable to meet demand and reliance on imported energy is costly and unsustainable

A Clean Solution

Cleaner power can help alleviate power deficits and reduce carbon footprint

Green Future

A greener and less carbon intensive future is possible with evolving technologies

Clean Energy – Gas, Solar, Hydrogen

Strategy

Cleaner energy with a plan to start small with modular expansion as risk is reduced

Proven gas has enormous potential as does solar in Botswana

Opportunities to leverage that potential are constantly being evaluated

Ability to rapidly change direction as business landscape changes

Why Hydrogen?

Hydrogen is becoming increasingly recognised as an ideal source of zero carbon emission energy

Hydrogen production processes and technology have advanced and costs have decreased

Hydrogen production has considerable synergies with Tlou's current operations

Why now?

Hydrogen is in demand

Tlou has the capacity to advance hydrogen while building grid connection for power sales

Adding another energy source to our production portfolio de-risks operations

Shift to cleaner power could help attract foreign investment

What about Gas-to-Power?

Tlou's low emission gas-to-power strategy is steadily progressing

An initial PPA has been secured and another in progress

Hydrogen production will evolve to include net zero emission gas-to-power opportunities

Significant progress to date

Proven gas for power generation and H₂ production

Gas flows using simple horizontal drilling without fracking

Extensive environmental approvals secured

Established CPF and Operations Base

Strategic distribution centre in Serowe

Experienced operations staff

In-country engineering & logistics expertise

Operating in Botswana for over a decade

Gas-to-Power

Natural gas will continue to play a significant role for many years, delivering energy the world needs and displacing higher emission fuels

A proven transition fuel to power change away from carbon-intensive coal and diesel

One of the most efficient and cost effective ways to transport gas is via conversion to electrons which represents Tlou's initial target

Gas can provide peaking electricity as required

Gas can provide baseload power generation

Tlou's currently flared gas can be put to near-term use for hydrogen production

Tlou owns 100% of the most advanced gas resource in Botswana with enormous upside potential

Gas-to-Power

Tlou's Lesedi Gas-to-Power project is the most advanced project of this type in Botswana

- ✓ Established gas infrastructure
- ✓ Continuous gas flows for many years
- ✓ Gas flow increase being observed
- ✓ Gas flow should further increase with more drilling
- ✓ 2MW Power Purchase Agreement (PPA) secured
- ✓ Larger 10MW PPA currently being progressed
- ✓ Commenced transmission line by awarding tender
- ✓ Project finance discussions ongoing

Gas-to-Power

Tlou gas production pod

Gas is available now for power generation and hydrogen production

Solar Power

Tlou's solar energy strategy is steadily progressing in a region of high solar incidence

Initial generation licence approved by BERA

Full environmental approvals in place for expansion

Can be used as a stand-alone clean and renewable power supply

Can be combined with Tlou's gas to provide 24 hours of cleaner baseload power supply

Can be used to produce "Green" hydrogen i.e. hydrogen sourced using renewables alone

Hybrid Power

Hybrid Power

Hybrid power solution using solar power and a battery back-up

- ✓ Solar-gas hybrid design ready to go
- ✓ Offers potential 24-hour baseload and peaking power
- ✓ One of Tlou's objective is to supply cleaner energy compared to the main alternatives currently available in both Botswana and the region
- ✓ Provides cleaner energy for growth initiatives
- ✓ Displaces existing carbon-intensive coal and diesel power

Hydrogen

Carbon Nanotube

A proven, clean transport fuel

More flexible and energy efficient than other sources

Tlou aims to produce Hydrogen by Electrolysis &/or Pyrolysis

Tlou is well-positioned to produce "Green" Hydrogen using solar

Water from Tlou's gas project could be utilised in Hydrogen production

Transportation use + value added products, e.g. carbon nanotubes, graphene

Power generation will evolve with time

Initially planning to utilise existing technology then innovate

Agreements with third parties being progressed

Pathway to Hydrogen revenue

Initially produce Hydrogen via electrolysis at the CPF

Compress H₂ and use in field operations

Expand to Serowe and use as a transport fuel noting that all the country's current supplies are imported

Initial stages can be done within Tlou's existing cash reserves

Concurrently develop a hydrogen and carbon product Pyrolysis prototype

Botswana will have access to a clean transport fuel with enormous upside for Tlou and the region

Tlou's Serowe Distribution Centre

Tlou's existing Serowe site is a potential H₂ distribution and refuelling centre in Botswana

Gas, Solar, Hydrogen...

- ✓ Clean energy for Botswana and beyond
- ✓ Production of electricity, H₂ and carbon products
- ✓ Extensive environmental approvals secured
- ✓ Social and economic benefits for Botswana
- ✓ Supportive stakeholders including government
- ✓ Project will be developed carefully in stages
- ✓ Sustainable employment and an enhanced quality of life in the region
