## Corporate Governance Statement

The Board ensures that OCCL acts as a responsible corporate citizen by adhering to corporate governance policies. The board is aware that stakeholders' perceptions affect OCCL's reputation. The Group is committed to promoting ethical business practice in all aspects of its operations. The board acts as the custodian for corporate governance.

OCCL conducts business with integrity and its leadership operates on strong ethical foundations. The board directs strategy and operations to build a sustainable business while considering the long-term impacts on the environment. Our corporate structure, business, operations and disclosure practices have been strictly aligned to our corporate governance policies. Transparency, accountability, fairness and communication with stakeholders are integral to our functioning.

The Group has adopted King Code (King III) as the framework for corporate governance. OCCL has applied the guidelines as entrenched in the revised Botswana Stock Exchange listing rules in so far as appropriate and practical for a company of its size.

### Company Secretary

The company secretarial function is outsourced to PricewaterhouseCoopers (Pty) Ltd (PwC Botswana). Mr Saumendu Sinha from PwC Botswana is responsible for this function. He is a Fellow member of Botswana Institute of Chartered Accountants with over 29 years' experience in both listed and unlisted environment. The board is satisfied that he has the competence and experience to perform the role.

The company secretary plays a critical role in the corporate governance of the Group, acting as the advisor to the Board, guiding directors in areas of corporate governance, legal and statutory amendments and the effective execution of Director's responsibilities and fiduciary duties. Directors have unrestricted access to the advice and services of the company secretary. The company secretary ensures that the Board and Committee charters are kept up to date. Furthermore, the company secretary helps the Board and the Audit and Risk Committee in the process of self-assessment. The board confirms that the relationship between the board and the company secretary remains at arm's length. The board reviews the relationship each year and ensures that the company secretary does not take on any management or executive duties for the board.

### Board Committees

- **Audit and Risk and Investment** - assists the Board in providing oversight of all matters relating to risk management, financial management and controls, financial accounting, audit and the external reporting requirements of OCCL and its subsidiary companies and oversees investment policies, advisor selection, strategy and fund performance to ensure the best possible outcome for the members or beneficiaries. The audit committee has satisfied itself on the expertise, experience and appropriateness of Chief Financial Officer for the period under review.
- **Governance, Nominations and Remuneration** - assists the Board in the discharge of its responsibilities and oversight relative to the remuneration and performance of the Chief Executive Officer and senior executives, remuneration of Directors and human resources policy and strategy and assists the Board in succession planning for the Board and ensuring the Board has the appropriate balance of skills, experience, independence and knowledge to enable it to effectively discharge its duties and responsibilities. Further, the Committee oversees who serves on the board of directors, as well as playing a central role in the selection and compensation of executive-level roles in the organization.

## Corporate Governance Statement (continued)

### Accountability and Compliance

#### Risk Management and Internal Controls

The board is responsible for the oversight of risk management process. The audit and risk committee reports to the board in this regard. The risk management policy was adopted to identify, assess, manage and monitor the risks to which OCCL is exposed.

Management has implemented systems of internal controls aimed at:

- safeguarding assets and reducing the risk of loss, error, fraud and other irregularities;
- ensuring the accuracy and completeness of accounting records and reporting;
- preparing timely and reliable financial statements and information in compliance with relevant legislation;
- complying with accounting policies and practices in accordance with International Financial Reporting Standards; and
- Increasing the probability of anticipating unpredictable risk. An internal audit function is not considered necessary. External auditors are used as required.

#### Dealings in the Company Securities

Directors, management and staff members are not permitted to transact in the company's shares in any way during closed periods and when they are in possession of unpublished price sensitive information in relation to OCCL securities. The Directors and Executive management are mandated to declare to the company secretary all personal dealings in the securities of the company and the same is disclosed to shareholders. All share transactions are disclosed on X-news within the time prescribed by the Botswana Stock Exchange listings requirements.

#### Legislative Compliance

Legislative and regulatory compliance is monitored by the Company Secretary. There were no cases of material legislative or regulatory non-compliance and no penalties or sanctions were imposed on OCCL or any of its directors or officers during the year.

#### Going Concern

The Board confirms that it is satisfied that the company has adequate resources to continue in business for the foreseeable future. For this reason, the company continues to adopt the going concern basis when preparing the financial statements.

## Board of Directors

### Christopher Walter Obura

#### Chairman - Non Executive.

Dr.Obura is a retired dentist and also a holder of a Bachelor's degree from Makerere University and an MSC from the University of London. He is the Chairman of Olympia Capital Holdings Limited since 1998. Dr. Chris W Obura is also the Chairman of Express Kenya limited which is also listed on the Nairobi Stock Exchange and also a director in other unlisted companies including ICEA Lion Holdings Ltd, Afridawa Holdings Limited, Nairobi Hospital Association and Karen Enterprises Ltd.

### Tebatso T. Lekalake

#### Non - Executive Director

I have a firm grasp of corporate banking and finance having worked as Head of Corporate Banking at First National Bank of Botswana and Corporate Director at Barclays Bank. I am a former Managing Director of Metropolitan Life Botswana and chairman of the Botswana Energy Regulatory Authority. I am currently a member of the board of Liberty Life Botswana and Chairman of its Audit & risk Committee. I am also an independent director of Aluwani Fund Managers and Chairman of the Maru-A-Pula Foundation.

## OLYMPIA CAPITAL CORPORATION LIMITED

(Registration number BW00002007272)

Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022

### Directors' Responsibilities and Approval

---

The directors are required in terms of the Companies Act, 2003 to maintain adequate accounting records and are responsible for the content and integrity of the consolidated and separate annual financial statements and related financial information included in this report. It is their responsibility to ensure that the consolidated and separate annual financial statements fairly present the state of affairs of the group as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards. The external auditors are engaged to express an independent opinion on the consolidated and separate annual financial statements.

The consolidated and separate annual financial statements are prepared in accordance with International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

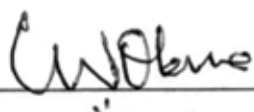

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the group and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the board of directors sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the group and all employees are required to maintain the highest ethical standards in ensuring the group's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the group is on identifying, assessing, managing and monitoring all known forms of risk across the group. While operating risk cannot be fully eliminated, the group endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the consolidated and separate annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the group's and company cash flow forecast for the year to 31 December 2023 and, in light of this review and the current financial position, they are satisfied that the group has access to adequate resources to continue in operational existence for the foreseeable future. The directors have assessed the ability of the company and its subsidiaries to continue as going concerns and have no reason to believe these businesses will not be going concerns in the year ahead.

The external auditors are responsible for independently auditing and reporting on the group's consolidated and separate annual financial statements. The consolidated and separate annual financial statements have been examined by the group's external auditors and their report is presented on pages 8 to 11.

The consolidated and separate annual financial statements set out on pages 8-66, which have been prepared on the going concern basis, were approved by the board of directors on 25/03/2023 and were signed on its behalf by:

## **Independent Auditor's Report**

**To the Shareholders of Olympia Capital Corporation Limited**

**Report on the Audit of the Consolidated and Separate Financial Statements**

### **Opinion**

We have audited the consolidated and separate annual financial statements of Olympia Capital Corporation Limited ("OCCL") (the group and company) set out on pages 12 to 66, which comprise the consolidated and separate statement of financial position as at 31 December 2022, and the consolidated and separate statement of comprehensive income, the consolidated and separate statement of changes in equity and the consolidated and separate statement of cash flows for the year then ended, and notes to the consolidated and separate consolidated annual financial statements, including a summary of significant accounting policies. In our opinion, the consolidated and separate annual financial statements presents fairly, in all material respects, the consolidated and separate financial position of Olympia Capital Corporation Limited as at 31 December 2022, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audits of financial statements in Botswana. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and in accordance with other ethical requirements applicable to performing audits in Botswana. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Material uncertainty related to going concern**

We draw attention to Note 33 to the separate annual financial statements, which indicates that the Company incurred a net loss of P491,600 (2021: P1,295,491) during the year ended 31 December 2022 and had accumulated losses of P34,245,305 (2021: P33,753,706) and, as of that date, the company's total liabilities exceed its total assets by P6,442,110 (2021: P5,950,511).

As stated in Note 33, these events or conditions, along with other matters as set forth in Note 33, indicate that a material uncertainty exists that may cast significant doubt on the company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

### **Key audit matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate annual financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate annual financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Material Uncertainty Related to Going

Concern section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
<p><b>Impairment of goodwill</b></p> <p>The Group's accounting policy in notes 1.2 and 5 of the consolidated financial statements states that goodwill with a carrying value of P1,284,488 (2021: P1,284,488) is measured at cost less any accumulated impairment loss.</p> <p>Goodwill arose when the Group assumed control of Kalahari Floor Tiles (Pty) Ltd (Manufacturer of floor tiles and chemicals).</p> <p>The group assesses goodwill for impairment on an annual basis, or earlier when there are indicators of impairment in accordance with IFRS.</p> <p>The recoverable amount of the goodwill has been determined by management using the higher of fair value less cost to sell and value in use calculations in accordance with the requirements of IAS 36. In this instance, the recoverable amount was determined based on value in use, by using the discounted cash flow model. The valuation techniques applied by management involves a significant amount of estimation and judgement.</p> <p>The most significant estimates and assumptions used in determining the valuation of the recoverable amounts includes among others:</p> <ul style="list-style-type: none"> <li>• Short – and long – term revenue growth;</li> <li>• Discount rates;</li> <li>• Capitalisation rates;</li> <li>• Net operating costs;</li> <li>• Working capital movement; and</li> <li>• Capital outlay</li> </ul> <p>The significance of the estimates and judgements involved, coupled with the high number of individual estimates performed, could result in a material misstatement, and therefore, warranted specific audit focus.</p> <p>The disclosure associated with goodwill impairment assessment is set out in the financial statements in the following notes:</p> <ul style="list-style-type: none"> <li>• Critical accounting estimates and judgements, impairment of goodwill.</li> <li>• Note 5 Intangible assets.</li> </ul>	<p>We performed the following substantive tests of detail on the impairment tests at the lowest level of cash generating units to which the goodwill has been allocated:</p> <ul style="list-style-type: none"> <li>• We tested the reliability of budgets and forecasts by comparing the actual results against the historical budgets and forecasts;</li> <li>• We tested whether the budgets and forecasts utilised to support the recovery of goodwill were approved by those charged with governance;</li> <li>• We tested reasonableness of assumptions used by management;</li> <li>• Testing the mathematical accuracy of the impairment assessment; and</li> <li>• We considered the appropriateness of disclosures in the consolidated financial statements.</li> </ul> <p>Having performed our audit procedures and evaluated the outcomes thereof, we concluded that our audit procedures appropriately addressed the key audit matter.</p>

**Other information**

The directors are responsible for other information. The other information comprises the information included in the document titled "Olympia Capital Corporation Limited consolidated and separate annual financial statements for the year ended 31 December 2022", which includes the Directors' Responsibilities and Approval, which we obtained prior to the date of this report. The other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the information is materially inconsistent with the consolidated and separate annual financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Responsibilities of the Directors for the Consolidated and Separate Annual Financial Statements**

The directors are responsible for the preparation and fair presentation of the consolidated and separate annual financial statements in accordance with International Financial Reporting Standards and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate annual financial statements, the directors are responsible for assessing the group's and company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group and/or the company or to cease operations, or have no realistic alternative but to do so.

**Auditor's responsibilities for the audit of the consolidated and separate annual financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated and separate annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate annual financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's and company's internal control.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's and company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and/or the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate annual financial statements, including the disclosures, and whether the consolidated annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated and separate annual financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Accounting Policies

for the year ended 31 December 2022

### Corporate information

Olympia Capital Corporation Limited is a public limited company incorporated and domiciled in Botswana and listed on the Botswana Stock Exchange. The consolidated and separate annual financial statements comprise the company and its subsidiaries (collectively referred to as “the Group”).

#### 1. Significant accounting policies

The principal accounting policies applied in the preparation of these consolidated and separate consolidated and separate annual financial statements are set out below.

##### 1.1 Basis of preparation

The consolidated and separate annual financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards (“IFRS”) and International Financial Reporting Interpretations Committee (“IFRIC”) interpretations issued and effective at the time of preparing these consolidated and separate annual financial statements and the Companies Act of Botswana.

The consolidated and separate annual financial statements have been prepared on the historic cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in Pula, which is the group and company’s functional currency.

These accounting policies are consistent with the previous period.

##### 1.2 Consolidation

###### Basis of consolidation

The consolidated and separate annual financial statements incorporate the consolidated and separate annual financial statements of the company and all subsidiaries. Subsidiaries are entities (including structured entities) which are controlled by the group.

The group has control of an entity when it is exposed to or has rights to variable returns from involvement with the entity and it has the ability to affect those returns through use its power over the entity.

The results of subsidiaries are included in the consolidated and separate annual financial statements from the effective date of acquisition to the effective date of disposal.

Adjustments are made when necessary to the consolidated and separate annual financial statements of subsidiaries to bring their accounting policies in line with those of the group.

All inter-company transactions, balances, and unrealised gains on transactions between group companies are eliminated in full on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Non-controlling interests in the net assets of consolidated subsidiaries are identified and recognised separately from the group’s interest therein, and are recognised within equity. Losses of subsidiaries attributable to non-controlling interests are allocated to the non-controlling interest even if this results in a debit balance being recognised for noncontrolling interest.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions and are recognised directly in the Statement of Changes in Equity.

The difference between the fair value of consideration paid or received and the movement in non-controlling interest for such transactions is recognised in equity attributable to the owners of the company.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.2 Consolidation (continued)

Where a subsidiary is disposed of and a non-controlling shareholding is retained, the remaining investment is measured to fair value with the adjustment to fair value recognised in profit or loss as part of the gain or loss on disposal of the controlling interest. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

### Investments in subsidiaries in the separate financial statements

In the company's separate financial statements, investments in subsidiaries are carried at cost less any accumulated impairment losses. This excludes investments which are held for sale and are consequently accounted for in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

### Business combinations

The group accounts for business combinations using the acquisition method of accounting. The cost of the business combination is measured as the aggregate of the fair values of assets given, liabilities incurred or assumed and equity instruments issued. Costs directly attributable to the business combination are expensed as incurred, except the costs to issue debt which are amortised as part of the effective interest and costs to issue equity which are included in equity.

Any contingent consideration is included in the cost of the business combination at fair value as at the date of acquisition. Subsequent changes to the assets, liability or equity which arise as a result of the contingent consideration are not affected against goodwill, unless they are valid measurement period adjustments. Otherwise, all subsequent changes to the fair value of contingent consideration that is deemed to be an asset or liability is recognised in either profit or loss or in other comprehensive income, in accordance with relevant IFRS's. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

The acquiree's identifiable assets, liabilities and contingent liabilities which meet the recognition conditions of IFRS 3 Business combinations are recognised at their fair values at acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current assets Held For Sale and Discontinued Operations, which are recognised at fair value less costs to sell.

Contingent liabilities are only included in the identifiable assets and liabilities of the acquiree where there is a present obligation at acquisition date.

On acquisition, the acquiree's assets and liabilities are reassessed in terms of classification and are reclassified where the classification is inappropriate for group purposes. This excludes lease agreements and insurance contracts, whose classification remains as per their inception date.

Non-controlling interests in the acquiree are measured on an acquisition-by-acquisition basis either at fair value or at the non-controlling interests' proportionate share in the recognised amounts of the acquiree's identifiable net assets. This treatment applies to non-controlling interests which are present ownership interests, and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation. All other components of noncontrolling interests are measured at their acquisition date fair values, unless another measurement basis is required by IFRS's.

In cases where the group held a non-controlling shareholding in the acquiree prior to obtaining control, that interest is measured to fair value as at acquisition date. The measurement to fair value is included in profit or loss for the year. Where the existing shareholding was classified as an available-for-sale financial asset, the cumulative fair value adjustments recognised previously to other comprehensive income and accumulated in equity are recognised in profit or loss as a reclassification adjustment.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.2 Consolidation (continued)

Goodwill is determined as the consideration paid, plus the fair value of any shareholding held prior to obtaining control, plus non-controlling interest and less the fair value of the identifiable assets and liabilities of the acquiree. If, in the case of a bargain purchase, the result of this formula is negative, then the difference is recognised directly in profit or loss.

Goodwill is not amortised but is tested on an annual basis for impairment. If goodwill is assessed to be impaired, that impairment is not subsequently reversed.

Goodwill arising on acquisition of foreign entities is considered an asset of the foreign entity. In such cases the goodwill is translated to the functional currency of the group at the end of each reporting period with the adjustment recognised in equity through to other comprehensive income.

### 1.3 Significant judgements and sources of estimation uncertainty

The preparation of consolidated and separate annual financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

#### Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

#### Expected manner of realisation for deferred tax

Management have reviewed the investment property portfolio of the group in order to determine the appropriate rate at which to measure deferred tax. Investment property is measured at fair value. The manner of recovery of the carrying amount, i.e. through use or sale, affects the determination of the deferred tax assets or liabilities. IFRS assumes that the carrying amount of investment property is recovered through sale rather than through continued use. Management considered the business model of the portfolio and concluded that the assumption is not rebutted and that the deferred taxation should be measured on the sale basis.

#### Key sources of estimation uncertainty

##### *Impairment of financial assets*

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. For details of the key assumptions and inputs used, refer to the individual notes addressing financial assets.

##### **Fair value estimation**

Several assets and liabilities of the group are either measured at fair value or disclosure is made of their fair values.

Observable market data is used as inputs to the extent that it is available. Qualified external valuers are consulted for the determination of appropriate valuation techniques and inputs.

Information about the specific techniques and inputs of the various assets and liabilities is disclosed in the relevant note in the consolidated and separate annual financial statements.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Impairment testing

The group reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. When such indicators exist, management determine the recoverable amount by performing value in use and fair value calculations. These calculations require the use of estimates and assumptions. When it is not possible to determine the recoverable amount for an individual asset, management assesses the recoverable amount for the cash generating unit to which the asset belongs.

#### Useful lives of property, plant and equipment

Management assess the appropriateness of the useful lives of property, plant and equipment at the end of each reporting period. The useful lives of motor vehicles, furniture and computer equipment are determined based on group replacement policies for the various assets. Individual assets within these classes, which have a significant carrying amount are assessed separately to consider whether replacement will be necessary outside of normal replacement parameters. The useful life of manufacturing equipment is assessed annually based on factors including wear and tear, technological obsolescence and usage requirements.

When the estimated useful life of an asset differs from previous estimates, the change is applied prospectively in the determination of the depreciation charge.

### 1.4 Investment property

Investment property is recognised as an asset when, and only when, it is probable that the future economic benefits that are associated with the investment property will flow to the enterprise, and the cost of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Fair value

Subsequent to initial measurement investment property is measured at fair value.

A gain or loss arising from a change in fair value is included in profit or loss for the period in which it arises.

### 1.5 Property, plant and equipment

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Expenditure incurred subsequently for major services, additions to or replacements of parts of property, plant and equipment are capitalised if it is probable that future economic benefits associated with the expenditure will flow to the group and the cost can be measured reliably. Day to day servicing costs are included in profit or loss in the year in which they are incurred.

Subsequent to initial recognition, property, plant and equipment is measured at cost less accumulated depreciation and any accumulated impairment losses, except for land and buildings which are stated at revalued amounts. The revalued amount is the fair value at the date of revaluation less any subsequent accumulated depreciation and impairment losses.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.5 Property, plant and equipment (continued)

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting year. When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is recognised in other comprehensive income and accumulated in the revaluation reserve in equity. The increase is recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in profit or loss in the current year. The decrease is recognised in other comprehensive income to the extent of any credit balance existing in the revaluation reserve in respect of that asset. The decrease recognised in other comprehensive income reduces the amount accumulated in the revaluation reserve in equity.

The revaluation reserve related to a specific item of property, plant and equipment is transferred directly to retained income when the asset is derecognised.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the group. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Not depreciated	Indefinite
Buildings	Straight line	40-50 years
Plant and machinery	Straight line	6-7 years
Furniture and fixtures	Straight line	8-12 years
Motor vehicles	Straight line	3-5 years
Office equipment	Straight line	6-7 years
Loose tools	Straight line	8-12 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.5 Property, plant and equipment (continued)

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Impairment tests are performed on property, plant and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property, plant and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

### 1.6 Intangible assets

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed every period-end.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Patents, trademarks and other rights	5 years

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.7 Financial instruments

Financial instruments held by the group are classified in accordance with the provisions of IFRS 9 Financial Instruments. Broadly, the classification possibilities, which are adopted by the group, as applicable, are as follows:

Financial assets which are equity instruments:

- Mandatorily at fair value through profit or loss; or
- Designated as at fair value through other comprehensive income. (This designation is not available to equity instruments which are held for trading or which are contingent consideration in a business combination).

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows); or
- Fair value through other comprehensive income. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is achieved by both collecting contractual cash flows and selling the instruments); or
- Mandatorily at fair value through profit or loss. (This classification automatically applies to all debt instruments which do not qualify as at amortised cost or at fair value through other comprehensive income); or
- Designated at fair value through profit or loss. (This classification option can only be applied when it eliminates or significantly reduces an accounting mismatch).

Derivatives which are not part of a hedging relationship:

- Mandatorily at fair value through profit or loss.

Financial liabilities:

- Amortised cost; or
- Mandatorily at fair value through profit or loss. (This applies to contingent consideration in a business combination or to liabilities which are held for trading); or
- Designated at fair value through profit or loss. (This classification option can be applied when it eliminates or significantly reduces an accounting mismatch; the liability forms part of a group of financial instruments managed on a fair value basis; or it forms part of a contract containing an embedded derivative and the entire contract is designated as at fair value through profit or loss).

Note 30 Financial instruments and risk management presents the financial instruments held by the group based on their specific classifications.

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.7 Financial instruments (continued)

The specific accounting policies for the classification, recognition and measurement of each type of financial instrument held by the group are presented below:

#### Trade and other receivables

##### Classification

Trade and other receivables, excluding, when applicable, VAT, employee costs in advance and prepayments, are classified as financial assets subsequently measured at amortised cost (note 8).

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the group's business model is to collect the contractual cash flows on trade and other receivables.

##### Recognition and measurement

Trade and other receivables are recognised when the group becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any except for trade receivables that do not contain a significant financing component which are measured at the transaction price determined under IFRS 15.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

##### Application of the effective interest method

For receivables which contain a significant financing component, interest income is calculated using the effective interest method, and is included in profit or loss in investment income (note 22).

The application of the effective interest method to calculate interest income on trade receivables is dependent on the credit risk of the receivable as follows:

- The effective interest rate is applied to the gross carrying amount of the receivable, provided the receivable is not credit impaired. The gross carrying amount is the amortised cost before adjusting for a loss allowance.
- If a receivable is a purchased or originated as credit-impaired, then a credit-adjusted effective interest rate is applied to the amortised cost in the determination of interest. This treatment does not change over the life of the receivable, even if it is no longer credit-impaired.
- If a receivable was not purchased or originally credit-impaired, but it has subsequently become creditimpaired, then the effective interest rate is applied to the amortised cost of the receivable in the determination of interest. If, in subsequent periods, the receivable is no longer credit impaired, then the interest calculation reverts to applying the effective interest rate to the gross carrying amount.

#### Trade and other receivables denominated in foreign currencies

When trade and other receivables are denominated in a foreign currency, the carrying amount of the receivables are determined in the foreign currency. The carrying amount is then translated to the Pula equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in other operating gains (losses) (note 20).

Details of foreign currency risk exposure and the management thereof are provided in the financial instruments and risk management (note 30).

## Accounting Policies

for the year ended 31 December 2022 (continued)

### Impairment

The group recognises a loss allowance for expected credit losses on trade and other receivables, excluding VAT, employee costs in advance and prepayments. The amount of expected credit losses is updated at each reporting date. The group measures the loss allowance for trade and other receivables at an amount equal to lifetime expected credit losses (lifetime ECL), which represents the expected credit losses that will result from all possible default events over the expected life of the receivable.

### 1.7 Financial instruments (continued)

#### Measurement and recognition of expected credit losses

The group makes use of a provision matrix as a practical expedient to the determination of expected credit losses on trade and other receivables. The provision matrix is based on historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current and forecast direction of conditions at the reporting date, including the time value of money, where appropriate.

The customer base is widespread and does not show significantly different loss patterns for different customer segments. The loss allowance is calculated on a collective basis for all trade and other receivables in totality. Details of the provision matrix is presented in note 8.

An impairment gain or loss is recognised in profit or loss with a corresponding adjustment to the carrying amount of trade and other receivables, through use of a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance (note 21).

#### Write off policy

The group writes off a receivable when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the group recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

#### Credit risk

Details of credit risk are included in the trade and other receivables note (note 8) and the financial instruments and risk management note (note 30).

#### Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition.

### Borrowings and loans payable

#### Classification

Loans from group companies, loans from shareholders and borrowings are classified as financial liabilities subsequently measured at amortised cost.

#### Recognition and measurement

Borrowings and loans from related parties are recognised when the group becomes a party to the contractual provisions of the loan. The loans are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.7 Financial instruments (continued)

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Interest expense, calculated on the effective interest method, is included in profit or loss in finance costs (note 23.)

Borrowings expose the group to liquidity risk and interest rate risk. Refer to note 30 for details of risk exposure and management thereof.

#### Loans denominated in foreign currencies

When borrowings are denominated in a foreign currency, the carrying amount of the loan is determined in the foreign currency. The carrying amount is then translated to the Pula equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (losses) (note 20).

Details of foreign currency risk exposure and the management thereof are provided in the specific loan notes and in the financial instruments and risk management (note 30).

#### Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition. Trade and other payables

#### Classification

Trade and other payables (note 15), excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

#### Recognition and measurement

They are recognised when the group becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs (note 23).

Trade and other payables expose the group to liquidity risk and possibly to interest rate risk. Refer to note 30 for details of risk exposure and management thereof.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.7 Financial instruments (continued)

#### Trade and other payables denominated in foreign currencies

When trade payables are denominated in a foreign currency, the carrying amount of the payables are determined in the foreign currency. The carrying amount is then translated to the Pula equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (losses) (note 20).

Details of foreign currency risk exposure and the management thereof are provided in the financial instruments and risk management note (note 30).

#### Derecognition

Refer to the “derecognition” section of the accounting policy for the policies and processes related to derecognition.

#### Cash and cash equivalents

Cash and cash equivalents are initially measured at fair value, and subsequently at amortised cost, using the effective interest rate method.

#### Bank overdrafts

Bank overdrafts are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

#### Derecognition

##### Financial assets

The group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the group retains substantially all the risks and rewards of ownership of a transferred financial asset, the group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

##### Financial liabilities

The group derecognises financial liabilities when, and only when, the group obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

#### Reclassification

##### Financial assets

The group only reclassifies affected financial assets if there is a change in the business model for managing financial assets. If a reclassification is necessary, it is applied prospectively from the reclassification date. Any previously stated gains, losses or interest are not restated.

The reclassification date is the beginning of the first reporting period following the change in business model which necessitates a reclassification.

##### Financial liabilities

Financial liabilities are not reclassified.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.8 Tax

#### Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

#### Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses and unused STC credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused STC credits can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

#### Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.9 Leases

The group assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is “identified”, which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the group has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

Any contingent rents are expensed in the period they are incurred.

#### Group as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the group is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the group recognises the lease payments as an operating expense (note 21) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

#### Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the group under residual value guarantees;
- the exercise price of purchase options, if the group is reasonably certain to exercise the option;
- lease payments in an optional renewal period if the group is reasonably certain to exercise an extension option; and
- penalties for early termination of a lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability (or right-of-use asset). The related payments are recognised as an expense in the period incurred and are included in operating expenses.

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs (note 23).

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.9 Leases (continued)

The group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the group will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

#### Group as lessor

Leases for which the group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. Lease classification is made at inception and is only reassessed if there is a lease modification.

When the group is an intermediate lessor, it accounts for the head lease and the sublease as two separate contracts. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the group applies the exemption described previously, then it classifies the sub-lease as an operating lease.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated by applying IFRS 15.

#### Operating leases

Lease payments from operating leases are recognised on a straight-line basis over the term of the relevant lease, or on another systematic basis if that basis is more representative of the pattern in which the benefits from the use of the underlying asset are diminished. Operating lease income is included in other operating income (note 19).

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and are expensed over the lease term on the same basis as the lease income.

Modifications made to operating leases are accounted for as a new lease from the effective date of the modification. Any prepaid or accrued lease payments relating to the original lease are treated as part of the lease payments of the new lease.

## Accounting Policies

for the year ended 31 December 2022 **(continued)**

### 1.10 Inventories

Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the entity.

When inventories are sold, the carrying amount of those inventories are recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

### 1.11 Impairment of assets

The group assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the group estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the group also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.
- tests goodwill acquired in a business combination for impairment annually.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss. Any impairment loss of a revalued asset is treated as a revaluation decrease up to the extent of the revaluation reserve available on the asset, where after additional decreases are recognised in profit or loss.

Goodwill acquired in a business combination is, from the acquisition date, allocated to each of the cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.11 Impairment of assets (continued)

Each unit or group of units to which the goodwill is so allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes, and is not larger than an operating segment as defined by paragraph 5 of IFRS 8 Operating Segments before aggregation.

An impairment loss is recognised for cash-generating units if the recoverable amount of the unit is less than the carrying amount of the units. The impairment loss is allocated to reduce the carrying amount of the assets of the unit in the following order:

- first, to reduce the carrying amount of any goodwill allocated to the cash-generating unit and
- then, to the other assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase after any excess previously recognised in profit or loss has also been reversed.

### 1.12 Stated capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Ordinary shares are recognised at no par value and classified as 'stated capital' in equity. Dividends are recognised as a liability in the group in which they are declared.

### 1.13 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

#### Severance benefits

Employees who are not members of an approved pension scheme or entitled to gratuities per their employee contracts, are entitled to severance benefits as regulated by the Botswana Employment Act. An accrual is recognised for the estimated liability for services rendered by the employees up to reporting date.

## Accounting Policies

for the year ended 31 December 2022 **(continued)**

### 1.14 Revenue from contracts with customers

The group recognises revenue from the following major sources:

- Sales of vinyl floor tiles and cleaning materials

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The group recognises revenue when it transfers control of a product or service to a customer.

Revenue is recognised using the five step model of revenue recognition as prescribed in IFRS 15 which are as follows:

- i. Identify the sales contract between the buyer and the seller
- ii. Identify the performance obligations in the sales contract
- iii. Determine the transaction price
- iv. Allocate the transaction price to the performance obligations in the contract
- v. Recognise revenue

#### Sale of goods

For sales of vinyl floor tiles and cleaning chemicals, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the wholesaler's specific location. Following delivery, the wholesaler has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when on selling the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due. No element of financing is deemed present as the sales are made with a credit term of 30 days, which is consistent with market practice.

### 1.15 Cost of sales

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The related cost of providing services recognised as revenue in the current period is included in cost of sales.

Contract costs comprise:

- costs that relate directly to the specific contract;
- costs that are attributable to contract activity in general and can be allocated to the contract; and
- such other costs as are specifically chargeable to the customer under the terms of the contract.

Cost of sales is reduced by the amount recognised in inventory as a "right to returned goods asset" which represents the group right to recover products from customers where customers exercise their right of return under the group returns policy.

## Accounting Policies

for the year ended 31 December 2022 (continued)

### 1.16 Translation of foreign currencies

Functional and presentation currency

Items included in the consolidated and separate annual financial statements of each of the group entities are measured using the currency of the primary economic environment in which the entity operates (functional currency).

The consolidated and separate annual financial statements are presented in Pula which is the group functional and presentation currency.

#### Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Pula, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous consolidated and separate annual financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Pula by applying to the foreign currency amount the exchange rate between the Pula and the foreign currency at the date of the cash flow.

## Notes to the Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022 (continued)

### 2. New Standards and Interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the group has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Reference to the Conceptual Framework: Amendments to IFRS 3	01 January 2022	The impact of the standard is not material.
• Annual Improvement to IFRS Standards 20182020: Amendments to IFRS 1	01 January 2022	The impact of the standard is not material.
• Annual Improvement to IFRS Standards 20182020: Amendments to IFRS 9	01 January 2022	The impact of the standard is not material.
• Property, Plant and Equipment: Proceeds before Intended Use: Amendments to IAS 16	01 January 2022	The impact of the standard is not material.
• Onerous Contracts - Cost of Fulfilling a Contract: Amendments to IAS 37	01 January 2022	The impact of the standard is not material.
• Annual Improvement to IFRS Standards 20182020: Amendments to IAS 41	01 January 2022	The impact of the standard is not material.

#### 2.2 Standards and interpretations not yet effective

The group has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the group's accounting periods beginning on or after 01 January 2023 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	01 January 2023	Unlikely there will be a material impact
• Disclosure of accounting policies: Amendments to IAS 1 and IFRS Practice Statement 2.	01 January 2023	Unlikely there will be a material impact
• Definition of accounting estimates: Amendments to IAS 8	01 January 2023	Unlikely there will be a material impact
Classification of Liabilities as Current or Non-Current - Amendment to IAS 1	01 January 2023	Unlikely there will be a material impact
IFRS 17 Insurance Contracts	01 January 2023	Unlikely there will be a material impact

## Notes to the Consolidated and Separate Annual Financial Statements

for the year ended 31 December 2022 (continued)

## Notes to the Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022 (continued)

### 3. Property, plant and equipment (continued)

#### Property, plant and equipment encumbered as security

The following assets have been encumbered as security for the borrowings in note 13:

Figures in Pula	Group		Company	
	2022	2021	2022	2021
Land and buildings	4,600,000	4,350,000	-	-
Plot 10223 Gaborone - Section 4 and 5	6,980,000	6,340,000	-	-

#### Revaluations

The group's land and buildings are stated at revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and accumulated impairment losses. Revaluations are performed every 2 years and in intervening years if the carrying amount of the land and buildings differs materially from their fair value.

The fair value measurements as of 31 December 2022 were performed by Home Safe Properties and Okavango Properties, independent valuers not related to the group. Both Home Safe Properties and Okavango Properties are members of the Institute of Valuers and they have the appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations.

The carrying value of the revalued assets under the cost model would have been:

Figures in Pula	Group		Company	
	2022	2021	2022	2021

### 4. Investment property

Group	2022			2021		
	Cost / Valuation	Accumulated depreciation	Carrying value	Cost / Valuation	Accumulated depreciation	Carrying value
Investment property	14,890,000	-	14,890,000	14,187,000	-	14,187,000

Reconciliation of investment property - Group - 2022			
	Opening balance	Fair value adjustments	Total
Investment property	14,187,000	703,000	14,890,000

Reconciliation of investment property - Group - 2021			
	Opening balance		Total
Investment property	14,187,000		14,187,000

#### Details of valuation

The effective date of the revaluations was 31 December 2022. Revaluations were performed by an independent valuer, S.L. Sedie Bsc (Hons) MRICS MREIB, of Home Safe Properties and Koketso Moloi MREIB of Okavango Properties. Both Home Safe Properties and Okavango Properties are not connected to the group and have recent experience in location and category of the investment property being valued.

The valuation was based on open market value for existing use.

#### Amounts recognised in profit and loss for the year

Rental income from investment property	903,314	1,117,521	-	-
Direct operating expenses from rental generating property	(196,989)	(204,974)	-	-
	<b>706,325</b>	<b>912,547</b>	<b>-</b>	<b>-</b>

	Opening balance	Total
Goodwill	1,284,488	1,284,488

When testing for impairment during the year and assessing future income, management has considered the assumptions relating to the sustainable growth. In assessing sustainable growth, management has taken into consideration of the impact of current economic environment has on the current year performance of the various CGU and the probable impact it will have on performance over the next 24 months. The estimation of pre-tax cash flows is sensitive to the periods for which forecasts are available and to assumptions regarding the long-term sustainable cash flows.

Management, in assessing sustainable cash flows, has considered the impact anticipated conservative consumer spending capacity could have on demand and as a result future cash flow forecasts have not only accounted for reduced income but has also factored increased operating costs in line with board approved budgets and strategies over the next 12 months and to manage working capital requirements in line with demand.

In terms of the Kalahari Floor Tiles goodwill, which has a carrying value of P1,284,488 no impairment was identified. The recoverable amount of goodwill is based on value-in-use calculations. This calculation utilises expected pre-tax cash flows, market related growth for 4 years and a reasonable growth rate applied thereafter, discounted at a risk adjusted interest rate appropriate to the cash generating unit (CGU).

### 6. Investments in subsidiaries

The following table lists the entities which are controlled by the group, either directly or indirectly through subsidiaries.

Company					
Name of company	Held by	% holding 2022	% holding 2021	Carrying amount 2022	Carrying amount 2021

### 8. Trade and other receivables (continued)

#### Exposure to credit risk

Trade receivables inherently expose the group to credit risk, being the risk that the group will incur financial loss if customers fail to make payments as they fall due.

In order to mitigate the risk of financial loss from defaults, the group only deals with reputable customers with consistent payment histories. Sufficient collateral or guarantees are also obtained when appropriate. Each customer is analysed individually for creditworthiness before terms and conditions are offered. Statistical credit scoring models are used to analyse customers. These models make use of information submitted by the customers as well as external bureau data (where available). Customer credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of customers, is continuously monitored.

The average credit period on trade receivables is 30 days (2021: 30 days). No interest is charged on outstanding trade receivables.

A loss allowance is recognised for all trade receivables, in accordance with IFRS 9 Financial Instruments, and is monitored at the end of each reporting period. In addition to the loss allowance, trade receivables are written off when there is no reasonable expectation of recovery, for example, when a debtor has been placed under liquidation.

The group's historical credit loss experience does not show significantly different loss patterns for different customer segments. The provision for credit losses is therefore based on past due status without disaggregating into further risk profiles. The loss allowance provision is determined as follows:

Group	2022		2021	
	Estimated gross carrying amount at default	Loss allowance (Lifetime expected credit loss)	Estimated gross carrying amount at default	Loss allowance (Lifetime expected credit loss)
<b>Expected credit loss rate:</b>				
Not past due: 0% (2020: 0%)	3,221,194	32,212	52,469	-
Less than 30 days past due: 1% (2020: 2.7%)	1,621,628	16,216	1,860,899	18,609
31 - 60 days past due: 1% (2020: 6.7%)	492,173	4,922	884,645	8,847
61 - 90 days past due: 2% (2020: 12.3%)	225,044	4,501	777,401	15,548
91 - 120 days past due: 5% (2020: 32.2%)	34,174	1,709	104,228	5,211
More than 120 days past due: 100% (2020: 4.2%)	223,881	223,881	170,338	170,338
<b>Total</b>	<b>5,818,094</b>	<b>283,441</b>	<b>3,849,980</b>	<b>218,553</b>

### 8. Trade and other receivables (continued)

	Group		Company	
Figures in Pula	2022	2021	2022	2021

#### Reconciliation of loss allowances

The following table shows the movement in the loss allowance (lifetime expected credit losses) for trade receivables:

Opening balance in accordance with IFRS 9	(218,553)	(224,952)	-	-
Provision raised on new trade receivables	(283,441)	(218,553)	-	-
Provisions reversed on settled trade receivables	218,553	224,952	-	-
Closing balance	(283,441)	(218,553)	-	-

#### Exposure to currency risk

The group is exposed to currency risk related to trade receivables because certain wholesale transactions are denominated in foreign currencies. Exchange rate exposures are managed within approved policy parameters utilising foreign forward exchange contracts where necessary. The currency in which the group deals primarily is the South African Rand.

There have been no significant changes in the foreign currency risk management policies and processes since the prior reporting period.

The net carrying amounts, in Pula, of trade and other receivables, excluding non-financial instruments, are denominated in the following currencies. The amounts have been presented in Pula by converting the foreign currency amount at the closing rate at the reporting date.

<b>Pula Amount</b>				
Pula	2,086,400	1,989,840	-	-
Rand	3,757,759	2,495,616	-	-
	<b>5,844,159</b>	<b>4,485,456</b>	-	-

### Foreign currency sensitivity analysis

The following information presents the sensitivity of the group to an increase or decrease in the respective currencies it is exposed to with regards to trade and other receivables. The sensitivity rate is the rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated trade and other receivables and adjusts their translation at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

### 30. Financial instruments and risk management (continued)

#### Capital risk management

The group's objective when managing capital (which includes share capital, borrowings, working capital and cash and cash equivalents) is to maintain a flexible capital structure that reduces the cost of capital to an acceptable level of risk and to safeguard the group's ability to continue as a going concern while taking advantage of strategic opportunities in order to maximise stakeholder returns sustainably.

The group manages capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain the capital structure, the group may adjust the amount of dividends paid to the shareholder, return capital to the shareholder, repurchase shares currently issued, issue new shares, issue new debt, issue new debt to replace existing debt with different characteristics and/or sell assets to reduce debt.

The group monitors capital utilising a number of measures, including the gearing ratio. The gearing ratio is calculated as net borrowings (total borrowings less cash) divided by shareholders' equity. The group's targeted gearing ratio is 20% - 50%.

The capital structure and gearing ratio of the group at the reporting date was as follows:

The capital structure and gearing ratio of the group at the reporting date was as follows:

## Notes to the Consolidated and Separate Annual Financial Statements

for the year ended 31 December 2022 (continued)

### 30. Financial instruments and risk management (continued)

#### Financial risk management

##### Overview

The group is exposed to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk (currency risk and interest rate risk).

The board of directors has overall responsibility for the establishment and oversight of the group's risk management framework. The board has established the risk committee, which is responsible for developing and monitoring the group's risk management policies. The committee reports quarterly to the board of directors on its activities.

The group's risk management policies are established to identify and analyse the risks faced by the group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the group's activities.

##### Credit risk

Credit risk is the risk of financial loss to the group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The group is exposed to credit risk on trade and other receivables and cash and cash equivalents.

Credit risk for exposures other than those arising on cash and cash equivalents, are managed by making use of credit approvals, limits and monitoring. The group only deals with reputable counterparties with consistent payment histories. Sufficient collateral or guarantees are also obtained when necessary. Each counterparty is analysed individually for creditworthiness before terms and conditions are offered. The analysis involves making use of information submitted by the counterparties as well as external bureau data (where available). Counterparty credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of counterparties is continuously monitored.

Credit risk exposure arising on cash and cash equivalents is managed by the group through dealing with well-established financial institutions with high credit ratings.

For trade receivables and contract assets which do not contain a significant financing component, the loss allowance is determined as the lifetime expected credit losses of the instruments. For all other trade receivables, contract assets and lease receivables, IFRS 9 permits the determination of the credit loss allowance by either determining whether there was a significant increase in credit risk since initial recognition or by always making use of lifetime expected credit losses. Management have chosen as an accounting policy, to make use of lifetime expected credit losses. Management does therefore not make the annual assessment of whether the credit risk has increased significantly since initial recognition for financial assets.

## Notes to the Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022 (continued)

### 30. Financial instruments and risk management (continued)

The maximum exposure to credit risk is presented in the table below:

Group		2022			2021		
		Gross carrying amount	Credit loss allowance	Amortised cost / fair value	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
Investments at fair value through profit or loss	9	280,000	-	280,000	160,000	-	160,000
Trade and other receivables	8	8,548,084	(283,441)	8,264,643	6,647,789	(218,553)	6,429,236
Cash and cash equivalents	10	3,659,443	-	3,659,443	4,148,776	-	4,148,776
Loan commitments		160,000	-	160,000	-	-	-
		<b>12,647,527</b>	<b>(283,441)</b>	<b>12,364,086</b>	<b>10,956,565</b>	<b>(218,553)</b>	<b>10,738,012</b>

Company		2022			2021		
		Gross carrying amount	Credit loss allowance	Amortised cost / fair value	Gross carrying amount	Credit loss allowance	Amortised cost / fair value
Cash and cash equivalents	10	6,824	-	6,824	6,824	-	6,824

Amounts are presented at amortised cost. The credit loss allowance is only shown for disclosure purposes.

#### Liquidity risk

The group is exposed to liquidity risk, which is the risk that the group will encounter difficulties in meeting its obligations as they become due.

The group manages its liquidity risk by effectively managing its working capital, capital expenditure and cash flows. The financing requirements are met through a mixture of cash generated from operations and long and short term borrowings. Committed borrowing facilities are available for meeting liquidity requirements and deposits are held at central banking institutions.

There have been no significant changes in the liquidity risk management policies and processes since the prior reporting period.

The maturity profile of contractual cash flows of non-derivative financial liabilities, and financial assets held to mitigate the risk, are presented in the following table. The cash flows are undiscounted contractual amounts.

## Notes to the Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022 (continued)

### 30. Financial instruments and risk management (continued)

#### Foreign currency risk

The group is exposed to foreign currency risk as a result of certain transactions and borrowings which are denominated in foreign currencies. Exchange rate exposures are managed within approved policy parameters utilising foreign forward exchange contracts where necessary. The foreign currencies in which the group deals primarily are Kenya Shillings and South African Rand.

There have been no significant changes in the foreign currency risk management policies and processes since the prior reporting period.

Details of foreign currency risk exposure are contained in the relevant notes throughout these financial statements.

#### Interest rate risk

Fluctuations in interest rates impact on the value of investments and financing activities, giving rise to interest rate risk. The debt of the group is comprised of different instruments, which bear interest at either fixed or floating interest rates. The ratio of fixed and floating rate instruments in the loan portfolio is monitored and managed, by incurring either variable rate bank loans or fixed rate bonds as necessary.

There have been no significant changes in the interest rate risk management policies and processes since the prior reporting period.

#### Interest rate profile

The interest rate profile of interest bearing financial instruments at the end of the reporting period was as follows:

	Note	Average effective interest rate		Carrying amount	
Group		2022	2021	2022	2021
<b>Liabilities</b>					
Borrowings	13	9.50 %	9.50 %	1,943,173	2,412,679
Variable rate financial liabilities as a percentage of total interest bearing financial liabilities				100.00 %	100.00 %

#### Interest rate sensitivity analysis

The following sensitivity analysis has been prepared using a sensitivity rate which is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. All other variables remain constant. The sensitivity analysis includes only financial instruments exposed to interest rate risk which were recognised at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

#### Group

At 31 December 2022, if the interest rate (JIBAR) had been 1.000% per annum (2021: 1.000%) higher or lower during the period, with all other variables held constant, profit or loss for the year would have been P 34,092 (2021: P 25,730) lower or higher.

### 31. Fair value information

Figures in Pula	Notes	Group		Company	
		2022	2021	2022	2021

#### Fair value hierarchy

The table below analyses assets and liabilities carried at fair value. The different levels are defined as follows:

**Level 1:** Quoted unadjusted prices in active markets for identical assets or liabilities that the group can access at measurement date.

**Level 2:** Inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly.

**Level 3:** Unobservable inputs for the asset or liability.

- Gains and losses recognised in profit or loss are included in Other income on the Statement of Comprehensive Income, except for gains and losses on financial assets and liabilities which have been included in fair value adjustments.
- Gains and losses recognised in other comprehensive income are included in Gains and losses on property revaluation.

#### Valuation techniques used to derive level 2 fair values

##### Land, office buildings and shopping malls

Level 2 fair values of land, office buildings and shopping malls have been generally derived using the sales comparison approach. Sales prices of comparable properties in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square metre.

No changes have been made to the valuation technique.

Description of valuation method and inputs of another class of level 2 fair values.

## Notes to the Consolidated and Separate Annual Financial Statements for the year ended 31 December 2022 (continued)

### 31. Fair value information (continued)

#### Information about valuation techniques and inputs used to derive level 3 fair values

##### Investment property - commercial property for leasing

Investment property - commercial property for leasing is determined applying a market comparison approach, using price per square metre for buildings derived from observable market data.

The key unobservable inputs, together with the weighted average range of probabilities, are as follows:

	Weighted average range of probabilities	
	High	Low
Price per square metre - Pula	12	15
Premium on quality of building and lease - %	50	60
Input	2	5
Other	8	10

The higher the price per square metre and premium on quality, the higher the fair value.

It is unlikely that a variation in any input by a reasonably possible alternative amount will significantly impact the valuation.

#### Valuation processes applied by the Group

The fair value of investment properties is determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of property being values. The valuation company provides the fair value of the Group's investment portfolio every six months.

### 32. Events after the reporting period

The directors are not aware of any material events that occurred between the year end and the date of signing the financial statements.

### 33. Going concern

The consolidated and separate annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The directors believe that the company has adequate financial resources to continue in operation for the foreseeable future and accordingly the consolidated and separate annual financial statements have been prepared on a going concern basis. The directors have satisfied themselves that the company is in a sound financial position and that it has access to sufficient borrowing facilities to meet its foreseeable cash requirements. The directors are not aware of any new material changes that may adversely impact the company. The directors are also not aware of any material non-compliance with statutory or regulatory requirements or of any pending changes to legislation which may affect the company.

## Notes to the Consolidated and Separate Annual Financial Statements

for the year ended 31 December 2022 (continued)

### 33. Going concern (continued)

We draw attention to the fact that at 31 December 2022, the company had accumulated losses of P (34,245,305) (2021: P(33,753,706) and that the company's total liabilities exceed its assets by P 6,442,110 (2021: P(5,950,511)). These conditions give rise to a material uncertainty which may cast significant doubt about the company's ability to continue as a going concern and, therefore that it may be unable to realise its assets and discharge its liabilities in the normal course of business. The ability of the company to continue as a going concern is dependent on a number of factors. The most significant of these is that the directors continue to procure funding for the ongoing operations for the company and that the subordination agreement referred to in note 16 of these consolidated consolidated and separate annual financial statements will remain in force for so long as it takes to restore the solvency of the company.

### 34. Intangible assets
